# The DRIVING FORCE behind water treatment systems

Water purification plants  
systems

Systems for  
swimming pool  
water treatment

Fish farming systems

Systems for  
wellness centres

Artificial wave systems

## Fish farming systems

*FPZ blowers are used for the oxygenation of fish farming tanks in order to keep the fish alive, both in fixed and mobile transport facilities.*

## Systems for wellness centres

*FPZ blowers are the driving force behind systems for the creation of the delightful bubbles caused by air jets typical of hydro-massage facilities, both in small home spas as well as large wellness centres.*

## Artificial wave systems

*FPZ blowers are fundamental for these imposing systems since their modular nature can handle large quantities of air both in pressure and vacuum.*

*FPZ also works in collaboration with client design team to provide technical support in order to choose the correct blower.*

**Compatible with Roots systems**

**Adaptable to plant size**

**Made in Italy quality**

**Accessories for compression and vacuum**

*Thanks to collaboration with global water treatment leaders, FPZ has developed a wide range of blowers and accessories specifically for the sector. FPZ is an Italian multinational company specialising in the production of blowers for use in the following sectors:*

## Water purification plants systems

*FPZ blowers are one of the essential components for the aeration of purification tanks during the aerobic digestion process in water purification plants, both personal and industrial, and are compatible with Roots systems.*

## Systems for swimming pool water treatment

*FPZ blowers are widely used in sports centres with swimming pools or in private swimming pools, both during the water purification phase and in the creation of hydro-massage areas or artificial waves.*

# FPZ

**FPZ is the leading Italian producer of blowers and sector specialist.**

Thanks to almost **40 years of experience in the design and production of blowers**, today FPZ is also a point of reference in the important water treatment sector, with thousands of machines operative in thousands of facilities over the 5 continents.

**FPZ is an Italian multinational company with 6 branches around the world** in addition to an international distribution network.
